

CBTOKEN is The Green Ecosystem on the Blockchain, built around The Definitive Cannabis Community Online.

It is “powered” by an ERC 20 Token on Ethereum. As such, it solves the inherent problems of the Cannabis Industry from the perspective of both the Operators, who need sorely missing tools to increase their market share. And from that of the End Users, who need to accrue cost efficiencies, be provided ease of access and, more importantly, belong to a strong Community they identify with.

Anticipating the exponential growth that its spreading legalization implies, CB TOKEN is building a unique platform that becomes a one-stop solution provider for the Cannabis Industry and its Participants. It will enable Users to share information, create, make new friends, trade tokens, and to purchase goods, merchandise, services and content. Consequently, it will increase geometrically the online presence, exposure and traffic for Market Operators together with their brand awareness and sales. In doing so, CB TOKEN will promote and support the overall growth of the Cannabis Market, and the spreading of its legalization across the Globe.

CB TOKEN maximises the Opportunities that arise with legal Marijuana, while minimising its downfalls and the factors that are hindering its growth. We leverage the resonance of Cannabis to create true value through Network Effects accrued thanks to the extended use of CB TOKEN throughout the dedicated Ecosystem.

Initially, CB TOKEN will be offered for sale on an exclusive basis under special Terms & Conditions for Early Adopters. At a later stage an ICO will be launched.

CB TOKEN will be generated in 3 rounds:

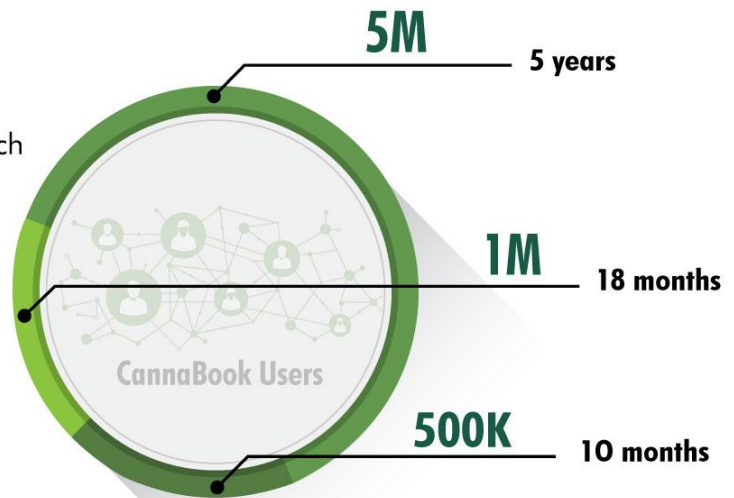

CB TOKEN is already set to be accepted as a means to transfer value within four innovative Platforms:

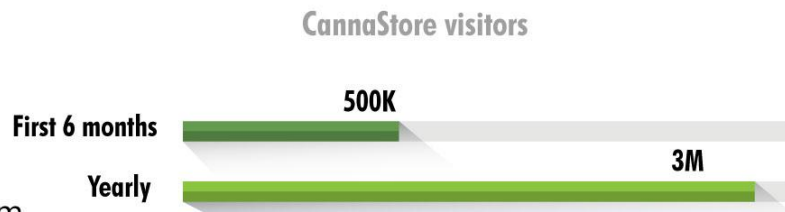

CANNABOOK

The vision is to provide digital channel which is easy to use and can offer great user experience for the supporters of the legal cannabis community.

- 280 Million registered legal cannabis users
- 400 million+ supporters of the legal cannabis industry

The vision is to create an E-commerce web site in the legal cannabis industry based on a coupon and discount system.

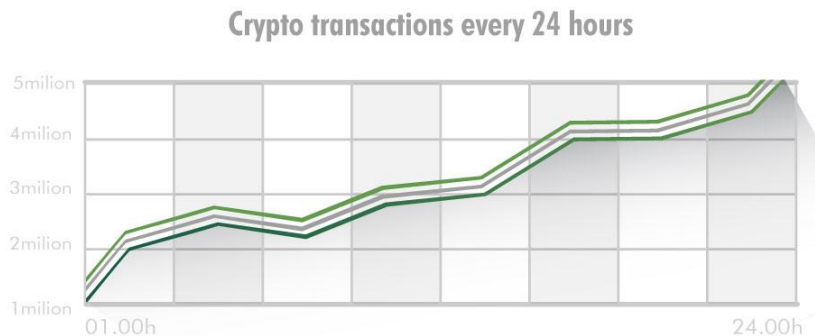

Virtual game about virtual collectibles in a world inspired by cannabis and built upon a non-Fungible token and its decentralized marketplace.

CannXchange

Crypto markets are trading between 25 and 30 billion dollars in daily volume.
